The Gold Standard in Governance Education

We recognize the importance of having prepared and insightful directors who have the courage to ask important questions and the ability to collaborate in the boardroom. Our Chartered Director (C.Dir.) program is Canada's original university accredited director development program. It offers a unique learning experience that covers not only formal rules and practices, but also the individual and collective behaviours associated with high-performing boards. **At The Directors College, you don't just learn it... you live it.**
